

Aqua Desk

board with built-in radiator

Material:	steel pipes diameter 25mm, thickness 1,25mm
Connection threads:	inner G1/2" (on order G3/4", or G1")
Testing overpressure:	1,3 MPa (13 bar)
Max. operating overpressure:	1,0 MPa (10 bar)
Max. operating temperature:	95°C

Aqua Desk with a built-in radiator is an ideal choice for corridors, vestibules and sheds where you want to save space. Massive beech board and hidden connection fittings make this radiator a design accessory for a log cabin or a cottage. The bench legs and internal radiator can be ordered in all RAL swatch colors.
